**Light up! The HD LED Battery Operated Drawer Light SE9030HD  
from Sensio Lighting**

Providing an innovative solution for drawers, Sensio Lighting has come up trumps with the launch of the *HD LED Battery Operated Drawer Light SE9030HD*.

Exclusively released by Sensio to the UK market, the SE9030 HD LED uses innovative sensor technology and energy efficient lighting. The SE9030 HD LED illuminates the drawer when activated by movement. Maximising storage space, these lights will make even the deepest, darkest and most awkward drawers fully accessible.

The SE9030 HD LED features the innovative *Higher Definition* technology which runs at only 0.3W. The SE9030 HD LED light has a very low energy consumption and produces no wasteful heat. In addition the LED's have a long lamp life of approximately 40,000 hours which means that replacements will be few and far between. The sensor technology also ensures that energy will never be wasted as it is only active when necessary.

Simple to install, the SE9030 HD LED has no wiring as it is simply powered by 4 rechargeable AAA batteries. Truly a low maintenance lighting solution, the batteries will only need replacing approximately every one and a half years if it is used for three minutes a day. Providing complete versatility, the unit can be mounted in anyway you choose. Fixing the light is simple as smart double sided 3M tape fixes the unit securely and neatly into any position. The SE9030 HD LED can be fixed to the back of a cabinet door and uses the Bistable function which activates the light when a hand moves over the sensor and deactivates by the repeated movement. The Monostable function is used when the light is mounted within a drawer and activates and deactivates the light by the drawer opening and shutting.

Each unit retails from £19.00 including (15%) VAT. The entire new LED HD lighting range can be found on the website at [www.sensio.co.uk](http://www.sensio.co.uk). Further information and price details are available from the website or alternatively, please call Sensio on 0845 0340 780.
