

Benefits

- Provides a diffused light effect
- Ensures the LED flexible strip will not droop or sag over time
- Provides additional protection to the flexible strip

Key Features

- Creates upwards and downwards facing light sources for maximum cabinet illumination
- Fits 4-8mm thick shelves
- Simple push-fit installation
- Can be cut to size
- Living hinge technology for ease of installation

Product overview

The Glow profile is an inconspicuous solution capable of transforming the appearance and functionality of feature cabinets.

The light source provides practical task lighting for cupboard rummaging, as well as emitting relaxing mood lighting that flows out into the kitchen.

The Glow features an innovative living hinge which means that the two parts of the profile stay attached when the flexible strip is installed, therefore making it much easier to clip the parts back together. The profile can also be cut to size on-site and attaches to the shelves with a simple push-fit.

Technical Specification

Material	Profile - Polycarbonate
Flexible strip compatibility	5mm wide strips or below

Mechanical Specification

Product Name	Dimensions (mm)	Weight (g)	IP Rating
Glow	H11.5, W19.5, L1000	70	IP20
